

AirParts Web Design & Development

AirParts belongs to ecommerce category where customer will buy the car parts easily.

As Web development is comprised of 3 parts.

1. Figma Uix design
2. Website Design
3. Web development

Figma/uix design:

Client will provide the uix/figma design consists of almost 15 pages

Website Design:

I will code the figma pages into html/bootstrap as a part of frontend design

Time period: 20-30 days (Depends on page structure)

Web development:

After the completion of web design, I will start its backend portion in Laravel & use MySQL as database.

Time period: 35-50 days

Quotation:

Cost of this project is more than 3000\$ as discussed. Estimated cost lies between 3000\$-5500\$ based on the discussion so far we have done, which will be paid in different milestones.

Project milestones:

1 milestone: Website Design (50% pages)

2 milestone: Website Design (50% pages)

3 milestone: Website Development (Backend + Database Design) 1st review of website

4 milestone: Website Development (Backend + Database Design) Final Review of website

Cost Milestones:

To initialize the project client will pay 10% (Right after client confirms the project)

15% percent after 1st milestone

15% percent after 2nd milestone

30% percent will be paid after 3rd milestone

30% after the completion of project (4th milestone)

Important: If Client cancel the project before initialization he will pay 10% of total cost, if client cancel project during design & development phase he will pay 20%-40% of cost.

Regards!!
